Importing Course Contents In LMS

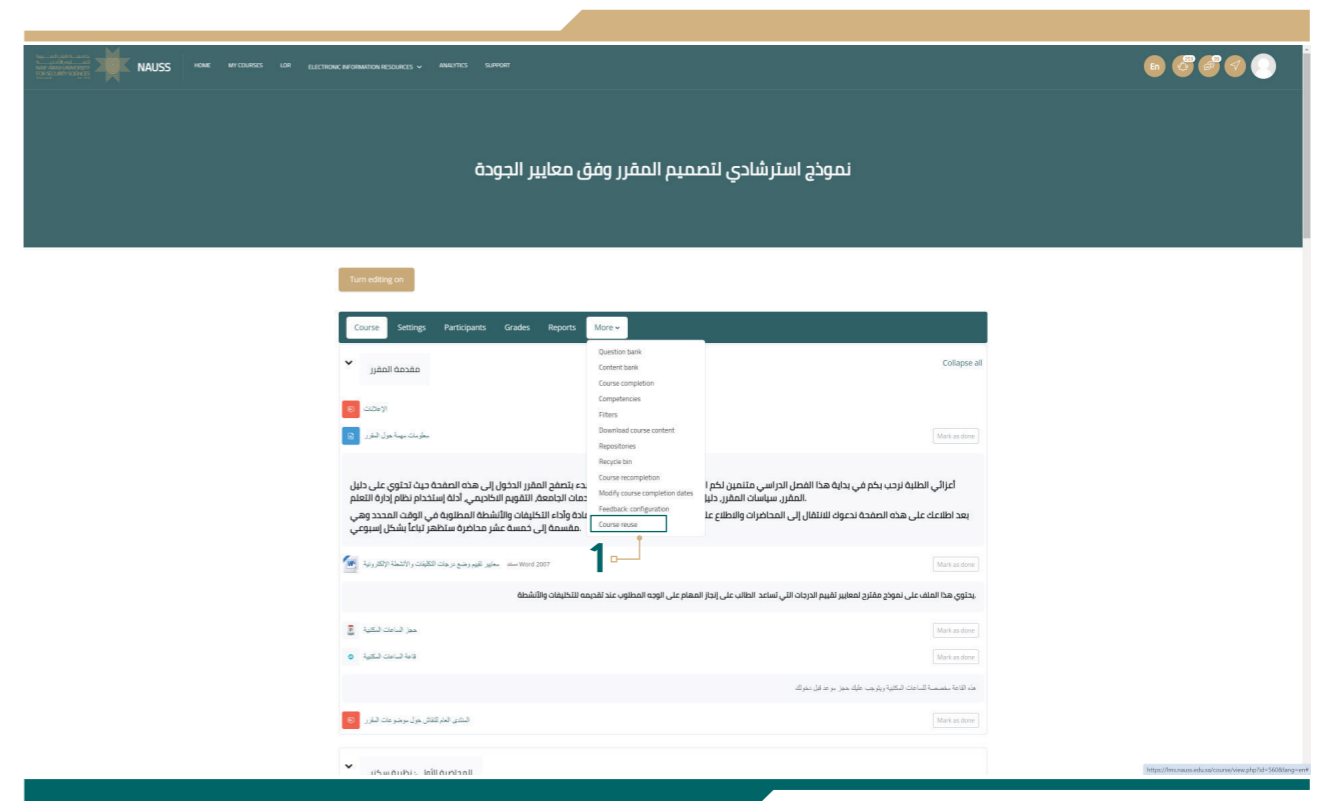

Introduction

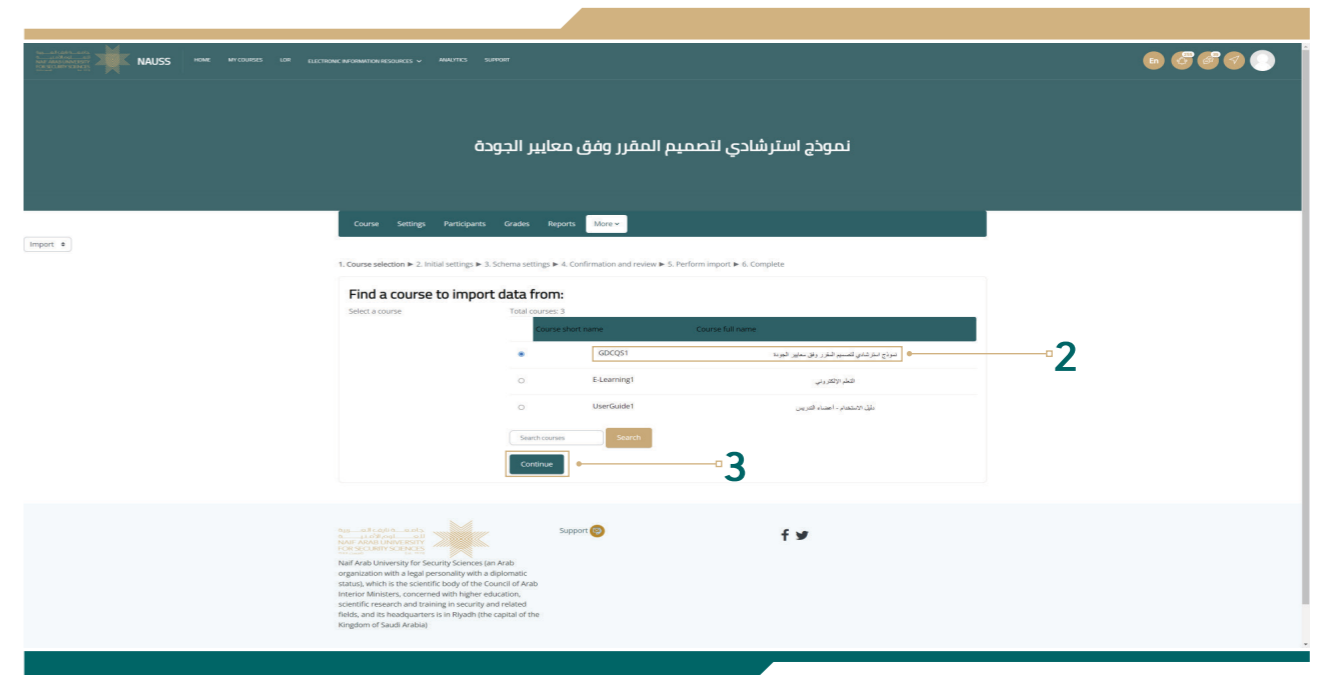

The Learning Management System “LMS” offers the opportunity to import the whole course or part of it to save the faculty members’ time and efforts in case they teach the same course for more than one section.

After entering the new course, do the following:
1- Click on (More), then choose (Course reuse).

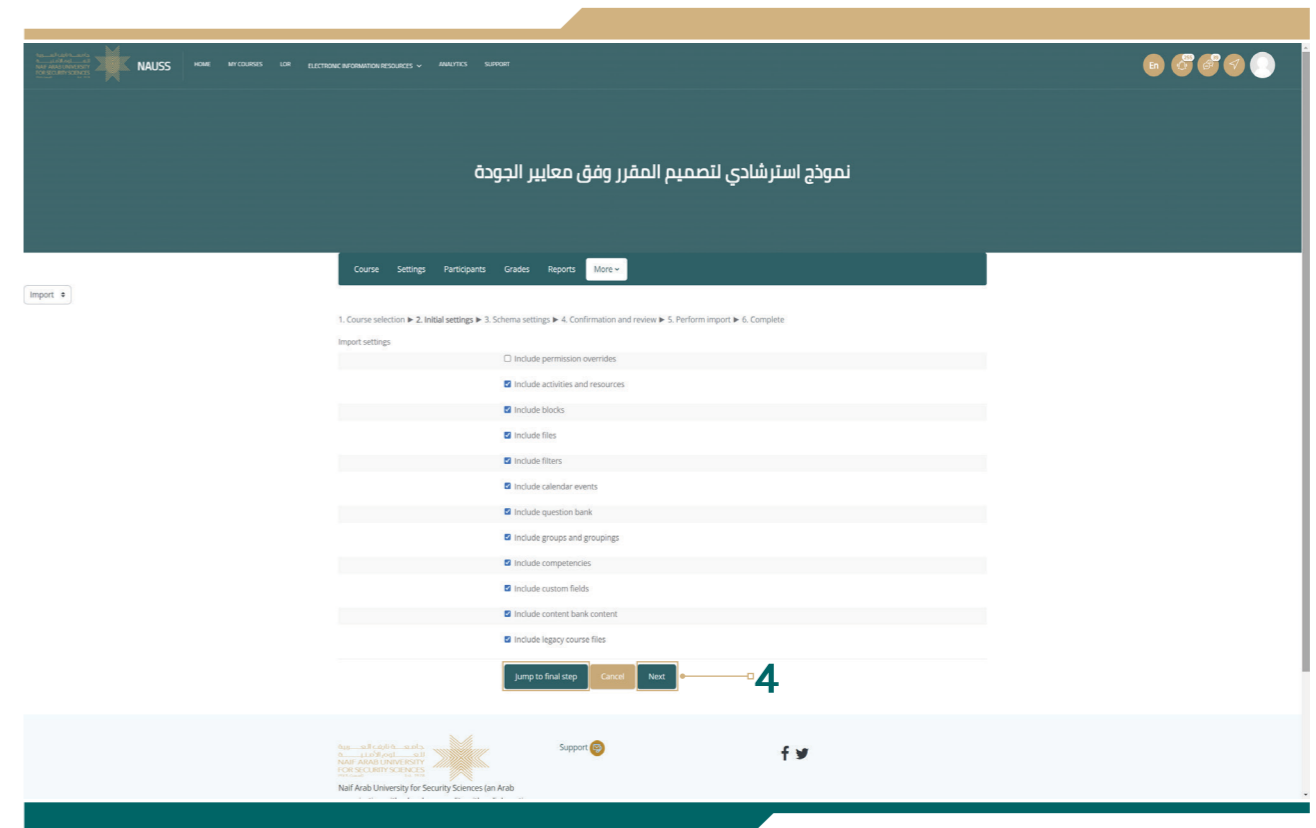

- 2- Choose the course to import data in the current course page.
- 3- Click on (Continue).

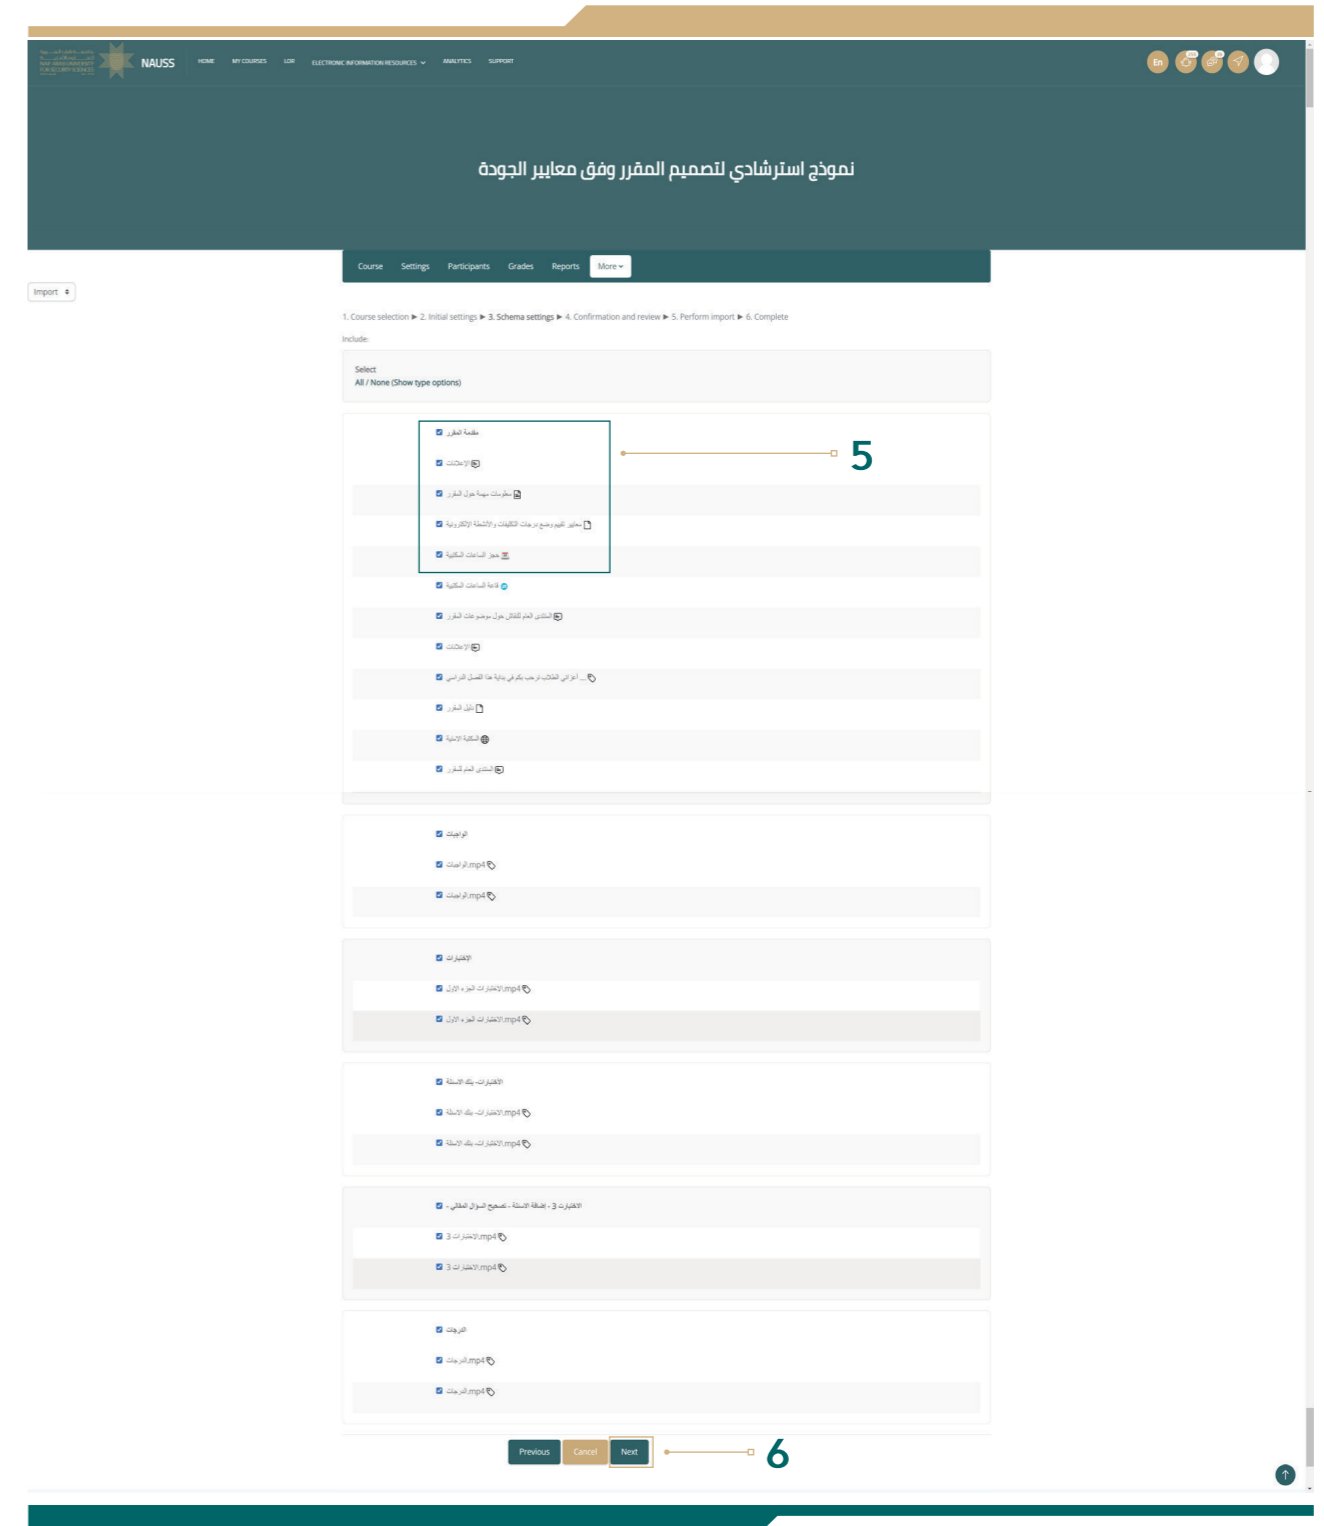

The current page will appear.

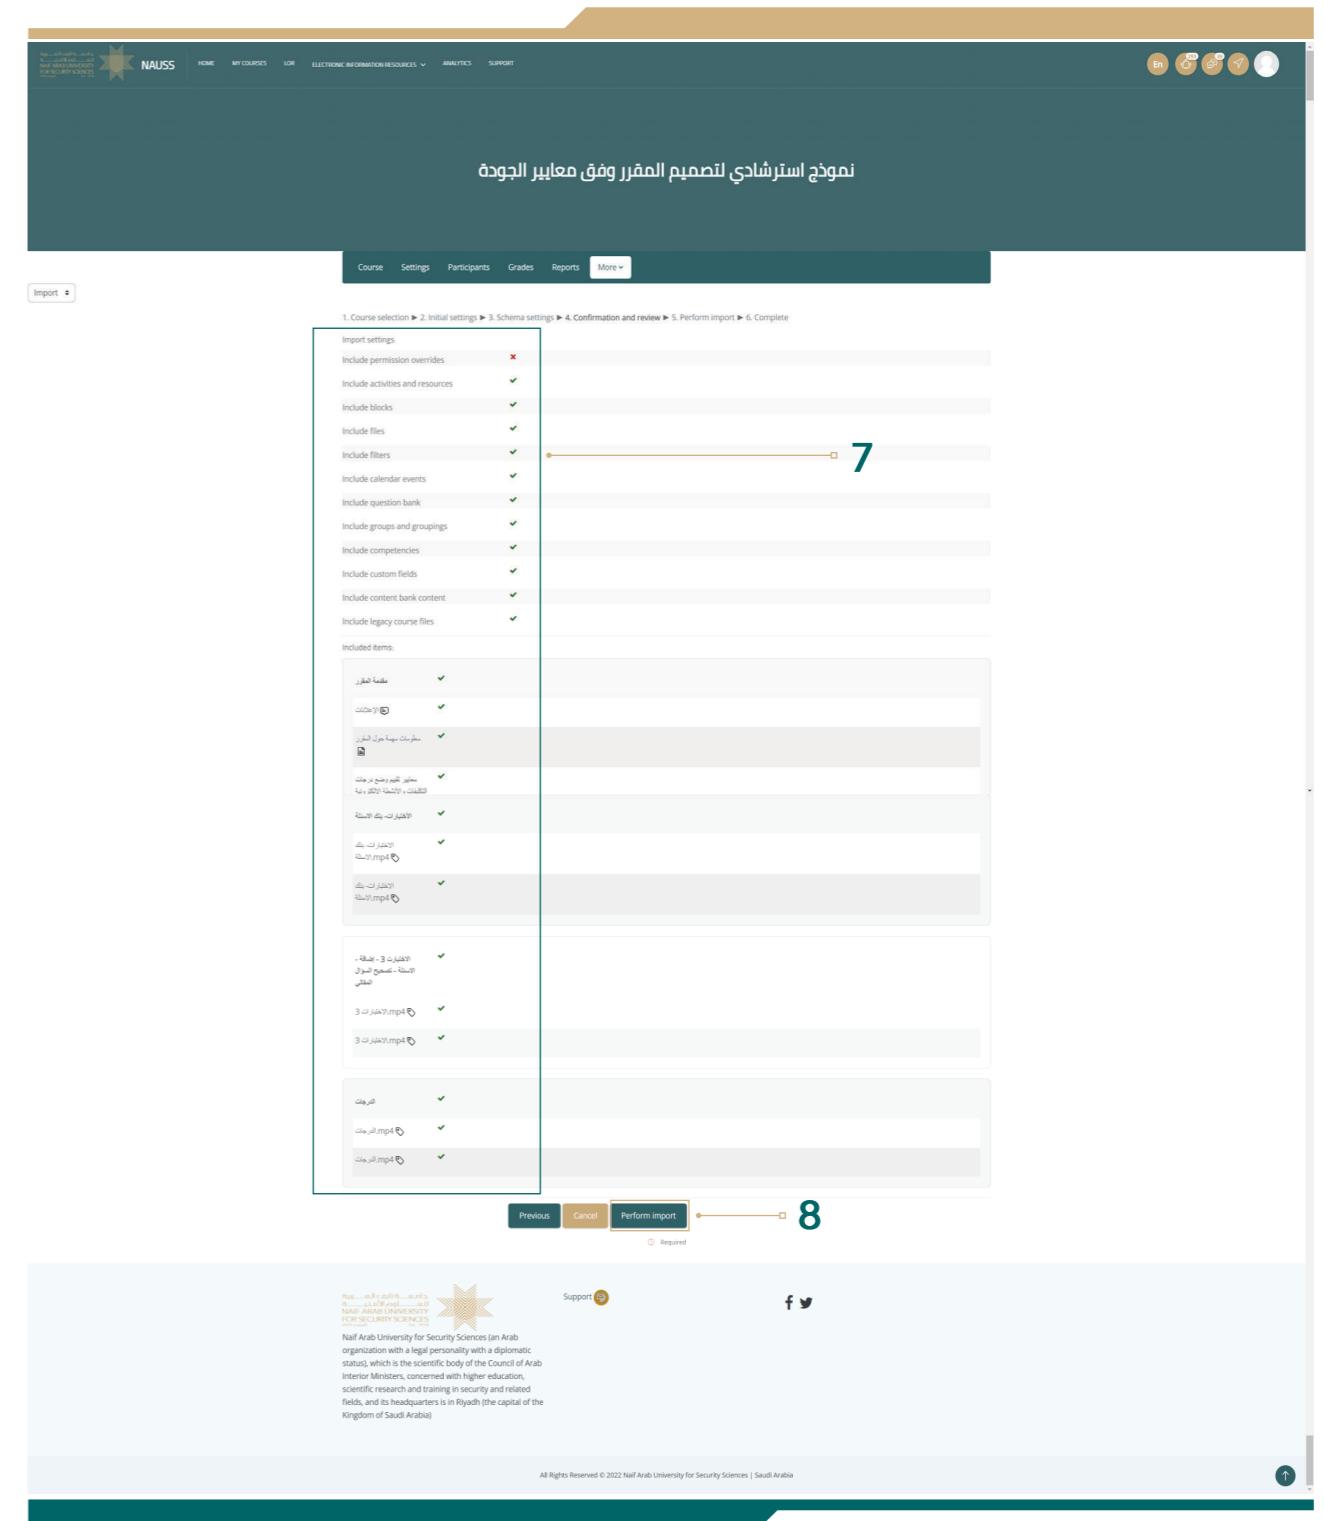

4- Click on (Jump to final step) to import the whole course or click on (Next) to exclude some contents of the course.

5- In this page you can choose the contents to import or exclude.
6- Click on (Next).

7-This page displays the list of desired contents to be imported.
 8-Click on (Perform import).

The imported contents will be shown in the course page.
